

THE No. 1 System
for Solvent Safety

NEW: "Arnold" Ball-Valve Funnel V2.0 with Hinged Lid

Strong Protection when collecting
Liquid Waste!

Clever Technology, Strong Protection!

Safety Funnel "Arnold"

✓ **NEW: Improved Closing**

Comfortable handling: easy, quick opening and closing with "click"-closure.

✓ **NEW: Hinged Lid with Sealing Ring**

For secure closure, when the funnel is not in use.

✓ **NEW: Stable Hinge**

A double-screw hinge, constructed of rust-free stainless steel: for long life and stability.

✓ **NEW: Optimized Spray Protection**

Air ducts directed downwards ensure for secure ventilation and cause any spray created to be returned to the funnel.

✓ **NEW: Optimized Dirt Sieve**

For collecting mixing magnets or large dirt particles. Laboratory bottles can also be placed here to dry off. The hole size has been optimized, in order to improve the running-off of chemicals.

Both sieve and spray protection can be removed for cleaning.

✓ **Ball-Valve**

The valve only opens up during filling, and then closes automatically afterwards - for a big "Plus" regarding safety!

✓ **Various Screw-Threads**

Suitable for different sizes of collecting canister (see Table on Page 3).

✓ **Safety Lance**

Ensures for safe and good flowing of sensitive chemicals, without any "stuttering".

✓ **NEW: Robust Design**

The new design provides for a high degree of stability as well as long life, and prevents any deformation of the funnel from occurring.

* The total height can vary, dependent upon the thread adapter with which the funnel has been delivered.

Information about "Delivery with Adapter":

The safety funnel "Arnold" is available in various container screw-thread sizes. In order that we may produce in an environmentally-friendly and economic manner, certain variants are delivered together with a screw-thread adapter. Those to which this applies can be seen in the column "Delivery with Adapter".
